

**EU-Projekt Sustainable NOW
Staff Trainee Program City of Munich – City of Ludwigsburg
Munich, 11th of April 2011**

Participants:

City of Ludwigsburg:

Department for Sustainable City Development: Albert Geiger, Steffen Weeber, Sandra Kölmel, Tanja Lukasik, Anja Wenninger

Department for Building Construction: Matthias Weißer, Gabriele Barnert, Peter Mangold, Karl Hagel

Energetikom – Competence center for energy, climate protection and eco design: Hans-Achim Werner

Ludwigsburg Energy Agency: Uwe Meyer

City of Munich:

Department of Health and Environment: Dr. Gerhard Urbainczyk

Building Centre: Nathalie Neuhausen, Manfred Giglinger

Construction Department: Robert Burkhard, Hans-Christoph Gruber, Peter Ostermeir, Carmen Schlüter

1. Building Center Munich

Nathalie Neuhausen, architect and energy advisor at the Building Center showed the Center to the visitors and explained how it works. The big exhibition about different energy aspects was shown and discussed. Too she gave information about how the Center is financed and about the very big network of people connected to it (Architects, engineers, craftsmen etc.).

2. Presentations and discussions at the Building Department

At the Building Department of the City of Munich first Mr. Ralf Nozicka presented different energy efficient and saving measures concerning **street lightning and traffic lights** in Munich. It was discussed how this examples can be transmitted to Ludwigsburg and what the City of Ludwigsburg is doing in this area.

Second part were lots of information by Mr. Robert Burkhard about the **energy management** for the city owned buildings in Munich. Key aspects were the energy standards of Munich, energy controlling, how to motivate users of the buildings to behave energy saving and how to find possibilities to improve the buildings. Ludwigsburg got many suggestions for their own buildings. Also school projects were presented and discussed.
